About this Report

Return to top

All market data contained within the CME Group website should be considered as a reference only and should not be used as validation against, nor as a complement to, real-time market data feeds. Settlement prices on instruments without open interest or volume are provided for web users only and are not published on Market Data Platform (MDP). These prices are not based on market activity.

Open Interest Profile Tool

Analyze open interest and open interest change patterns for each expiration within the selected product.

Open Interest Heatmap

Track the concentration of put and call positions across expirations and strikes and view how each has changed over the last day, week, or month.

Commitment of Traders

Drawn from CFTC report data, see which trader types have positions in a market you want to trade, at what size, whether they're long or short, and chart changes over time.

Vol2Vol Expected Range

A visual representation of volatility indicates the number of standard deviations a strike is from the ATM futures price, while offering the ability to chart open interest and volume.
